9 BRAUNSCHWEIG (Jerome) THE VERTUOSE BOKE OF DISTYLLACYON of the waters of all manner of Herbes, with the fygures of the styllatoryes. Sm. folio, title in red and black with woodcuts, numerous woodcuts in text, wanting 7 leaves, several others defective, calf. £22 0 0 *Laurence Andrewe: London,* 1527

⁂ FIRST EDITION.

THE FIRST ENGLISH BOOK ON DISTILLING. It was translated by the printer Andrewe. The work forms a herbal, as the large majority of cuts are those of plants. There is little doubt that Andrewe was connected in some way with Peter Treveris of Southwark, as some woodcuts are found both in this book and in *The Grete Herball* printed by the latter.

⁂ FIRST EDITION.

Surg. Gen. Lib. Cat. 38. III. 553; Munk I. 368. VERY RARE. Not in Watt, Lowndes, Hirsch or the Roy. Med. and Chirug. Soc. Cat.

12 BROUN (Andrew) A VINDICATORY SCHEDULE, concerning the new cure of fevers: containing a disquisition theoretical and practical of the new and most effectual method of cureing continual fevers, first invented and delivered by the sagacious Dr. Tho. Sydenham. Also shewing, by way of preliminary, the indispensable charge lying on physicians, to improve themselves, and the art, with the reasons why many palpable improvements in medicine, make so little progress. Where a new hypothesis of fevers, for establishing this method, is laid down, and several phaenomena are clearly resolved, applyed, and brought home to the confirmation thereof. With an appendix of Sanctorius his *Medicina statica,* for clearing the doctrine of insensible perspiration, whereupon that hypothesis is founded. By Andrew Broun, M.D. 12mo, title written on, a few leaves slightly stained, old calf. £4 5 0

EARLY PRINTED BOOKS:

23 **CUNINGHAM (William,** M.D.): THE COSMOGRAPHICAL GLASSE, conteinyng the pleasant Principles of COSMOGRAPHIE, GEOGRAPHIE, HYDROGRAPHIE, or NAVIGATION. Compiled by WILLIAM CUNINGHAM, Doctor in Physicke; *beautifully printed in a large italics, with woodcut title, fine and large portrait æt.* 28, *coat of arms of the Earl of Leicester (dedicatee), numerous other fine woodcuts, including large initials, and folding plan of Norwich,* folio, *contemporary (? original) limp vellum (a small portion of the left top corner of title defective, title loose, and slightly dust-soiled, also very slight water-stains on blank corners of a few ll., and tears in the plan of Norwich, otherwise an* **exceptionally fine and large copy**), *with old inscr.: 'Sum Joannis Ponderi Senioris' on title,* £1200

Excussum Londini in officina Joan. Daij Typographi. Anno, 1559

This is one of the rarest, as well as one of the earliest, English books on science, and one of the finest specimens of early English typography. The fine woodcuts, some of which are by the author himself, illustrate early astronomical and surveying instruments, and include one which the author claims to have invented himself (pp. 86-7), with an illustration of it. The Second Booke shows 'sundry waies for th' exacte findyng out of the Meridian Line, the Longitude, Latitude,' etc., and pp. 160-1 contain one of the earliest descriptions of the magnetic needle. Of special interest are pp. 200-2, which give 'A particular Description of suche partes, of America, as are by trauaile founde out,' mentioning 'It taketh the name of America, of Americus Vesputius, who by the comaundment of Ferdinando king of Castell, founde it out, in the yeare of Christe our Saviour, 1497, about th' ende of June.' There is no word of the discovery by Columbus in this account. The inhabitants are described as 'filthy at meate & in all secret actes of nature comparable to brute beastes. Their bread is rotes & theyr meate mans fleshe, for all theyr enemies, which they ouercome, they with great bankettyng deuoure,' etc., etc., etc.

The work is excessively rare. No copy can be traced of having been sold since 1925, when one in a modern binding fetched £500 at auction. The portrait and plan of Norwich, contained above, are missing in most copies.

EARLY PRINTED BOOKS:

19 **COMES (Natalis ;** *vere* NOEL CONTI) MYTHOLOGIÆ, sive Explicationum Fabularum Libri X, in quibus omnia prope Naturalis & Moralis Philosophiæ Dogmata sub Antiquorum Fabulis contenta fuisse demonstratur, cum locupletissimis Indicibus ; *with printer's device on title and last l.*, 4to. *old hf. calf* (*slightly rubbed, otherwise a sound and clean copy*), £1. 15*s*
Venetiis, 1568

20 **COTTA (John,** M.D.) The INFALLIBLE TRUE and ASSURED WITCH : or the Second Edition of the Tryall of Witch-Craft, shewing the right and true Methode of the Discoverie with a Confutation of erroneous Waies, carefully reviewed and more fully cleared and augmented, sm. 4to. (pp. xvi + 155, with Errata Leaf at end), *contemporary limp vellum* (*title and next leaf stained, and last* 5 *ll. mended*), £5. 5*s* 1625

'The work by which Cotta is best remembered . . . . The erroneous ways confuted by Cotta are those by means of fire and water and the like, which are convincingly shown to be foolish and misleading.'—*D.N.B.*

This second edition differs from the first in only a few minor particulars.

21 **COURTENAY FAMILY :** De STIRPE et ORIGINE DOMUS de COURTENAY, quæ coepita Ludovico Crasso Huius nominis sexto Francorum Rege Sermocinatio. Cui inserti sunt Supplices libell i Reg i ad hanc rem oblati, una cum repræsentatione iuris & meritorum presentis instantiæ. Addita sunt responsa celeberrimorum Europæ Juris consultorum ; *with folding pedigree* (*MS. copy*), thick 8vo. *contemporary vellum* (*back, and with it, inner blank margins of some ll. damaged by small bomb splinter during an air raid in* 1941, *otherwise a fine copy*), £7. 10*s* *Parisiis*, 1607

A very rare account of the ancient family of Courtenay, of which the English branch is represented by the Earls of Dorset, consisting of twenty-two separate pieces, the largest one of 298 pages, which is entitled : Dionysius Gothofredus I. C. primarius iuris professor Heidelbergue' [*sic*]. Gibbon, who devotes a long section to the Courtenays in his *Roman Empire*, does not quote the work, which seems to have been unknown to him. Brunet states that 'R. Heber [1773-1833] avait réuni jusqu'à 4 exemplaires de ce volume réputé très-rare, lesquels ont été vendus separément, £3. 3*s*, £1. 18*s* et £1. 18*s*.'

The same authority mentions the sale price of 49 fr. for the Martainville copy, containing 20 separate pieces, or two less than the above copy. Copies very rarely occur for sale, only one can be traced as having been sold by auction during the last 35 years.

22 **CROMWELL (Oliver) :** [BETHEL (Slingsby)] The WORLD'S MISTAKE in OLIVER CROMWELL, or a short Political Discourse, shewing that Cromwells Mal-administration (during his Four Years and Nine Moneths pretended Protectorship) layed the Foundation of Our present Condition, in the DECAY of TRADE, sm. 4to. (pp. 20), *contemporary vellum cover from old MS. bill* (*very sound and clean copy*), £3. 3*s* 1668

'A severe censure of Cromwell's foreign policy, and of his conduct towards Lilburne and Sir Henry Vane.'—*D.N.B.*

24 **[DALLISON (Charles)]** The ROYALIST'S DEFENCE : vindicating the KING'S PROCEEDINGS in the late WARRE made against him, clearly discovering, how and by what Impostures the Incendiaries of these Distractions have subverted the knowne Law of the Land, the Protestant Religion, and reduced the people to an unparallel'd SLAVERY, sm. 4to. (pp. 142), *new brown polished calf, uncut, t.e.g.*, £3. 10*s* 1648

25 **DALTON (Michael)** The COUNTREY JUSTICE, containing the Practice of the Justices of the Peace out of their Sessions, Gathered for the better helpe of such Justices as have not been much conversant in the studie of the Lawes of this Realme, now for the SIXTH time published, revised and much inlarged, *title within elaborate woodcut border*, folio, *contemporary calf* (*rebacked*), £7. 10*s* *printed for the Company of Stationers*, 1635

'Of high repute in the seventeenth century, says the *D.N.B.*, which does not record the above edition, but mentions a fourth (!) (probably posthumous) in 1655, on the title of which, the *D.N.B.* erroneously states, the author is first described as 'one of the Masters of Chancerie.' In point of fact that claim is made in the addition of 1635 described above. Incidentally, according to *D.N.B.*, his name does not appear in Hardy's list of the Masters of Chancery.

26 **DIOGENES LAERTIUS :** The LIVES, OPINIONS, and REMARKABLE SAYINGS of the most famous ANCIENT PHILOSOPHERS, written in Greek by DIOGENES LAERTIUS, with the Lives of several other Philosophers written by Eunapius of Sardis, made English by several Hands, *with portrait*, 2 vols. post 8vo. *sprinkled calf, gilt backs, yellow edges* (*small worm-hole in title page and frontispiece of* V. 1, *otherwise a nice clean copy*), £3. 10*s* 1688-96

JOHN GOULD'S ORNITHOLOGICAL WORKS :

711 **The BIRDS of AUSTRALIA, complete with the SUPPLEMENT,** with a copious Introduction, Descriptions of each Species, Table of the Range or Distribution, etc., *with* 681 *plates beautifully and accurately* COLOURED TO NATURE, 8 vols. impl. folio, *half dark green morocco gilt, gilt edges (a few plates very slightly foxed as usual, but the binding* AS GOOD AS NEW*)*, £650. 1848-69

712 **MONOGRAPH of the FAMILY of RAMPHASTIDÆ or TOUCANS, first edition,** *with* 33 BEAUTIFUL HANDCOLOURED *plates, some being by* EDWARD LEAR, *and* 1 *plate plain*, 1834 : **The TROGONIDÆ, or FAMILY of TROGONS ; first edition,** *with* 36 BEAUTIFUL HANDCOLOURED PLATES, 1838—2 vols. impl. folio in 1, *full red morocco extra, broad gold borders on sides, gilt back, gilt edges*, £115. 1834-8

The TOUCANS constitute a group of Birds confined to the tropical portions of AMERICA. They are distinguished by the richness and strong contrasts of the colouring of their plumage, and particularly by the enormous size of their Bills. ' The TROGONS may dispute the palm of beauty with the Humming-Birds. Their plumage in certain parts shines with metallic brilliancy, and exhibits all the colours of the rainbow.'—*Cuvier.*

UNIQUE SET WITH THE PLATES IN TWO STATES :

713 **MONOGRAPH of the TROCHILIDÆ, or HUMMING-BIRDS ; the complete work, including the RARE SUPPLEMENT,** with copious INTRODUCTION, BIBLIOGRAPHY, NAME-LISTS, and DESCRIPTIONS of each SPECIES, etc., *with* 418 BEAUTIFUL HANDCOLOURED PLATES *showing the birds in a setting of flowers and plants, their natural habitat ;* **also (added) the complete set of uncoloured impressions,** 6 thick vols. impl. folio, NEWLY BOUND IN FULL GREEN POLISHED MOROCCO GILT, *board inside borders, gilt edges, with the original printed wrappers preserved* (**A unique and magnificent set of this most beautiful work**), £875. 1861-87

Undoubtedly the most universally attractive of all MR. GOULD'S publications, who thus speaks of it :—' Having from an early period devoted himself to the study of these beautiful birds, and acquired a most valuable and extensive collection of a group peculiar to America and its adjacent islands, the author determined upon publishing a Monograph of a family unequalled for the gorgeous and ever-changing brilliancy of their hues, the variety of their form, the singularity of their habits, and the extent of their territorial distribution.'

It is not generally appreciated how magnificent this work is from the botanical point of view, the birds being depicted in a most attractive setting of brightly-hued flowers and foliage.

THE UNFINISHED WORK ON THE PITTA :

714 **MONOGRAPH of the PITTIDAE,** or ANT-THRUSHES of the OLD WORLD, **Part I,** *with* 10 FINE HANDCOLOURED PLATES, **Part II,** Text only, comprising ten full Descriptions, the plates to which were never published—the 2 Parts bound together in 1 vol., impl. folio, *printed boards, cl. back*, £12. 12*s* 1880-1

Though this was never completed it should certainly be added to all sets of Gould's Works. Part II is not mentioned in Dr. Bowdler Sharpe's great INDEX TO GOULD and was only recently discovered. The ten descriptions in the second part were written by Dr. Sharpe and bear his initials.

THE INDISPENSABLE INDEX TO GOULD :

715 **SHARPE (Richard Bowdler,** LL.D.) ANALYTICAL INDEX to the WORKS of JOHN GOULD [with LIFE], *with fine woodburitype portrait*, impl. 8vo., *cl., t.e.g.*, £1. 10*s* 1893

716 ——— A LARGE PAPER COPY [giving ample room for MS. Notes and References], impl. 4to. *cl., t.e.g., or half morocco, t.e.g. (rubbed)*, £3. 3*s*

This remarkable work, the labour of many years, contains over 17,000 cross-references to all species figured in Mr. Gould's grand works, and is indispensable to all owning them, and to ornithological students wishing to consult them in public libraries. The whole edition was limited to 250 copies on small and 100 ON LARGE PAPER.

Dear Sir

I have just succeeded in hearing of a copy of Grignon Memoires de Physique sur l'Art de fabriquer le fer en 1775 — described as "old binding-worn. 11 plates folded instead of 13. a few water stains "clear" — (presumably this means that the water marks have not left a dark stain —) You notice that it is incomplete, lacking 2 plates and yet they are asking £1.17.6! The 1807 edn. appears to have been a mere reprint

Very faithfully yours

D. Nutt (A.G. Berry)
